

COVID Tracing and Attestation - Print

In accordance with the Governor's Phase 1 Higher Education & Critical Infrastructure Workforce Training Restart COVID-19 Requirements document, Green River College is required to collect the following information for staff, faculty and students and all in-person classroom attendees, daily:

1. Enter your SID Number:

2. What class are you here for?

3. Please review the following list of symptoms:

- A new fever (100.4 F or higher) or a sense of having a fever?
- A new cough that you cannot attribute to another health condition?
- New shortness of breath that you cannot attribute to another health condition?
- A new sore throat that you cannot attribute to another health condition?
- New muscle aches that you cannot attribute to another health condition or that may have been caused by a specific activity, such as physical exercise?
- New respiratory symptoms, such as sore throat, runny nose/nasal congestion or sneezing, that you cannot attribute to another health condition?
- New chills or repeated shaking with chills that you cannot attribute to another health condition?

- New loss of taste or smell that you cannot attribute to another health condition?

Additionally, anyone who has travelled out of state or has been exposed to a COVID-19 positive family member must quarantine for 14 days before returning to campus.

By selecting YES, I attest I screened myself prior to arriving on campus and I do NOT have ANY of the above symptoms, nor do I require a 14 day quarantine.

- Yes
- No

4. Coronavirus (COVID-19) is an illness caused by a virus that can spread from person to person. The virus that causes COVID-19 is a new coronavirus that has spread throughout the world. COVID-19 symptoms can range from mild (or no symptoms) to severe illness. You can become infected by coming into close contact (about 6 feet or two arm lengths) with a person who has COVID-19. COVID-19 is primarily spread from person to person. You can become infected from respiratory droplets when an infected person coughs, sneezes, or talks. You may also be able to get it by touching a surface or object that has the virus on it, and then by touching your mouth, nose, or eyes. **A person infected with the coronavirus may be asymptomatic, suffer mild discomfort, or experience severe illness, including death. Persons in the following categories are at high risk of suffering severe illness:**

- **60 years of older**
- **Living in a nursing home or long-term care facility**

People of all ages with underlying medical conditions, particularly if not well controlled, including persons with:

- **Chronic lung disease or moderate to severe asthmas**
- **Serious heart conditions**
- **Immunocompromised**
- **People with severe obesity (body mass index [BMI] of 40 or higher)**
- **People with diabetes**
- **People with chronic kidney disease undergoing dialysis**
- **People with liver disease**

Students who are at high risk should contact their instructor as soon as possible to discuss possible reasonable accommodations by postponement of requirements until a later date. There is currently no vaccine to protect against COVID-19. The best way to protect yourself is to avoid being exposed to the virus that causes COVID-19. For health care workers, including nursing students and clinical faculty, the risk of contracting COVID-19 is minimized by adhering to the Centers for Disease Control (CDC) infection control guidelines (<https://www.cdc.gov/infectioncontrol/basics/index.html>) when caring for patients/residents during clinical experiences. To participate in the clinical or lab portions of a program, or otherwise come onto campus, students and employees must adhere to 1) standard precautions, 2) isolation precautions by wearing Personal Protective Equipment (PPE) and 3) hand hygiene practices to minimize infection spread when caring for patients/residents during clinical or in the lab setting.

While participating in the classroom, offices, fieldwork, lab or clinical portions of a program, I agree to adhere to the following requirements:

1. - If I am sick and/or exhibiting any potential signs of COVID-19, e.g., fever (100.4F), chills, shortness of breath, cough, sore throat, runny nose, body aches, diarrhea or vomiting, I will notify my instructor assigned immediately, or my supervisor, and not attend class, a clinical, fieldwork, or a lab, or come onto campus for employee duties.

2. - During classes, clinical rotation, and/or while attending lab, I will adhere to infection prevention practices by following the CDC guidelines of implementing standard precautions and isolation precautions when caring for patients/residents or practicing skills.

- Yes
- No

5. Assumption of the Risk

I understand and acknowledge that I am currently enrolled at Green River College, and that the classroom, lab, fieldwork, office and/or clinical site I am assigned to is a Washington State designated essential workplace that is allowed to continue operating pursuant to the "Stay Home Stay Healthy Order" (the Order) announced by the Governor on March 23, 2020. I have been instructed regarding universal safety precautions and isolation precautions to adhere to while completing classes.

If applicable, I also understand and acknowledge that the Order designates nursing and health sciences students studying and engaged in clinical and health related studies as essential personnel. In order to complete my studies at the College, I have chosen to participate in lab, fieldwork, and/or clinical components of my education. I have been instructed regarding universal safety precautions and isolation precautions to adhere to while completing my lab and clinical experiences or otherwise entering campus buildings in person.

I understand, however, that in completing my classes, lab or clinical experiences at an essential workplace during the COVID-19 outbreak, there may be some inherent risks that cannot be eliminated regardless of the care taken to avoid injury/infection. Such risks include, but are not limited to, respiratory failure, organ failure, death, exacerbation of existing health conditions, stress, social-stigmatization, and/or spreading the infection to others.

I voluntarily choose to participate in-person at Green River College in classes, or at my clinical program with full knowledge that the activities may be hazardous. I voluntarily assume full responsibility for any risks of injury, illnesses, loss, or death. I further voluntarily assume full responsibility for all such damages caused to others by my conduct. **I understand that if I am a person in a high-risk category, I can ask the College to provide a reasonable accommodation by postponement of classes or clinical requirements until a later date.** I certify I have read and understand, and am competent to sign this document. I hereby voluntarily sign this document and knowingly assume the above described risks and responsibilities associated with completing my clinical program at Green River College and its assigned classroom, lab or clinical facilities, or in any other classroom, office, or fieldwork location.
